SMT Test Points (bulk)

★★★★☆

\$25.00 - \$30.00

* 100 pieces

These test points are designed to facilitate the connection of test probes to PCBs which are primarily surface mount in design.

SMT PROTOTYPING BOARDS

SchmartBOARD™ ez

Patent pending technology makes soldering childishly simple. The solder mask is higher than the pads, creating canals. The walls of the canal are made by the solder mask, the floor by the pad surface. The legs of the I.C. fit into this canal making hand placement and soldering a snap... Some boards are for specific pin/pitch - but most are 'universal' - the PLCC board accommodates 20-84 pins. We stock these 'universal' boards; PLCC (.05"), QFP (.4mm, .5mm, .65mm, .8mm), SO (.05"), SOP (.4mm, .635mm, .8mm). We also have a number of specific size boards.
